Art Unit: 1791

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-17, 20-22, 27 and 29-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richard in view of Soane -514 and Nagata et al for reasons of record.

2. Claims 18 and 23-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richard in view of Soane -514 and Nagata et al and further in view of Shen et al for reasons of record.

3. Claims 19, 24 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richard in view of Soane -514 and Nagata et al and further in view of Orlosky for reasons of record.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 1791

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13-32 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,391,231 in view of Soane -514 and Nagata et al for reasons of record. Again, the terminal disclaimer has not been checked for compliance and hence this rejection needs to be repeated. Upon approval of the terminal disclaimer, the double patenting rejection will be dropped.

5. Applicant's arguments filed February 25, 2008 have been fully considered but they are not persuasive. Applicant has submitted a declaration in an effort to remove Richard from the rejection. However, the declaration of Nancy Yamasaki states in paragraphs 4 and 5 that Exhibits B and C describe experiments in making optical quality parts of **high-impact polyurethane-based material** when in fact these Exhibits do not reveal what the material used is. Hence, the declaration is not probative at this point due to what is set forth in paragraphs 4 and 5 of the declaration. Correction of this matter would appear to render the declaration probative. Unfortunately, the terminal disclaimer filed September 25, 2007 has again not been checked for compliance and hence the double patenting rejection is being maintained. Upon approval of the terminal disclaimer, the double patenting rejection will of course be dropped.
